Transcribe

SpeechExec

LFH7257

## Pronounced simplicity

Transcription has never been so comfortable

SpeechExec<sup>SR</sup> Pro Transcribe provides you with a transcription management platform that unites workflow automation, transcription features and speech recognition in one seamless solution. Advanced features allow ever increasing dictation volumes to be handled efficiently, and to create documents quicker and with greater accuracy. SpeechExec<sup>SR</sup> Pro Transcribe assists you in creating a smooth and future-proof working environment in all documentation-intensive businesses.

### Professional operation

- Visual workflow management enables priority documents to be transcribed in order of preference
- Actual job information provides all relevant dictation data while transcribing
- Multiple sort and filter options allows individual organization of workload
- Seamless integration of speech recognition

### Advanced functions

- The "New job" alarm notifies the transcriptionist for an immediate transcription start
- Automation of tasks boosts your efficiency and reduces document turnaround time
- Data protection allows only authorized persons access to documents

### Designed around you

- SpeechExec<sup>SR</sup> Pro and Philips hardware encompass all possible dictation scenarios
- Short familiarization process thanks to the clearly structured user interface

**PHILIPS**  
sense and simplicity

## Product highlights

### One for all

Regardless of the user's tech skills, the SpeechExec<sup>SR</sup> Pro Suite and Philips digital dictation devices encompass all possible dictation scenarios. The easy-to-use and simple to set up solution, together with Philips dictation hardware make Philips the one-stop-shop for all dictation matters.

### All for one

The complete dictation process, speech recognition and document workflow is mapped within one simple application. All tasks are managed within the same framework so you do not have to leave the application for any dictation related task.

### Hands-off policy

Automation of tasks lightens the file handling workload and boosts your efficiency. Automatic download of recordings, self-acting routing of jobs to network folders or speaking directly into predefined templates for instant document creation ease your daily tasks.

### Looks familiar

The familiar application interface makes for a fast familiarization process with new SpeechExec<sup>SR</sup> Pro users, as well as for former tape based recorder users.

### Safe & sound

Data protection (encryption and decryption) allows only authorized persons to access your documents. Thanks to the professional DSS Pro file format you can protect all dictation files with passwords, in order to avoid unauthorized access.

### Visual job overview

At-a-glance job overview enables you to organize and plan your workload more efficiently. Thanks to visual workflow management, the transcription of priority documents in your preferred order is managed as straightforwardly as possible. Multiple sort/filter options allow for individual organization of files.

### "New job" alarm

The alarm sound notifies the recipient of new jobs coming in, allowing an immediate start of the transcription.

### Access to job information

Relevant data such as dictation length, author name, key words and priority status are accessible throughout the entire transcription process by means of a dictation properties display.

### Attach a document

SpeechExec<sup>SR</sup> Pro Transcribe offers the capability to attach a document directly to a dictation. This supports document archiving and retrieval.

### Versatile player

Various features, such as a graphical position indicator, an audio volume meter and audible scan function facilitate the transcription process. Speed control, DSS Pro / DSS / WAV / WMA / MP3 playback and automatic backspace provide first-class reproduction of your dictations.

### Automatic file transfer and updates

Dictation files are transferred automatically using the network, email or FTP. Automatic updates via internet as well as the possibility to define default settings provide highly convenient administration.

### Digital Speech Standard (DSS)

The .dss file format is the international standard for professional speech processing. Offering outstanding audio quality for recorded voice, .dss files allow a high compression rate, reduce file size, network traffic and required storage capacity. The format also allows additional information such as client/patient name and document type to be stored in the file header, further facilitating file organization.

## Specifications

### System Requirements (without Speech recognition)

- Recommended: Pentium IV or similar, 1 GHz and 1 GB RAM
- 100 MB hard disk space, 250 MB for Microsoft .NET Framework
- 1 free USB port
- Recommended minimum transfer rate for LAN: 100 Mbit/s
- Windows Vista (SP2), Windows XP (SP3), Windows 7

### Green specifications

- Compliant to 2002/95/EC (RoHS)
- Lead-free soldered product

### Package contents

- SpeechExec<sup>SR</sup> Pro Dictate software
- USB License key
- Quick start guide

### Available with

- SpeechExec Pro Transcription Set 7277

SpeechExec<sup>SR</sup> Pro supports Dragon NaturallySpeaking Professional Series Editions from Nuance
