**ABOUT SPEAKEASY SOLUTIONS:** Speakeasy Solutions Inc. is dedicated to providing you with personal, professional, and honest service. We strive to maintain ongoing relationships with our clients and provide them with expert support and the information they need to maximize their potential.

You will quickly discover how speech recognition (also referred to as voice recognition), and digital voice dictation and transcription enhances your day-to-day operations and increases productivity.

Speakeasy Solutions continually researches dictation and associated technologies to ensure that you receive current information and valuable assistance on a timely basis.

Speakeasy Solutions focuses on your particular needs above all else — providing you with customized, personal, and premium service.

**HISTORY OF SPEAKEASY SOLUTIONS:** In the late 1990s the future founders of Speakeasy Solutions were stricken with upper limb chronic repetitive

stress injuries, placing their occupations on hold. Their careers spanning the fields of administration, IT/IS and law, as well as a life-long natural affinity for technology, paved the way towards the formation of a new and highly specialized vocation: speech recognition and digital voice dictation providers.

At the time, Dragon NaturallySpeaking was in its infancy (version 3 had just been released) and the first professional digital

voice recorders were entering the market. A few companies in North America were offering these products and fewer still providing accompanying services.

Speakeasy Solutions was formed in 2000 with a sincere desire in providing quality dictation solutions to professionals and those with physical limitations. Speakeasy Solutions' founding principles were:

- Offer honest advice with the client's best interests in mind.
- Provide excellent service exceeding industry standards.
- Continually improve product and service offerings through ceaseless research in order to provide clients with "the best" products, support, and service possible

These are Speakeasy Solutions' core values, and they always will be.
