

What's new in Dragon[®] for Mac[®]

Let your voice empower you at work.

Dragon for Mac speech recognition software empowers individual Mac users to be more productive at work by enabling fast, highly accurate dictation and transcription with the right level of customization to speed document creation. Add custom words such as specific industry terminology, insert frequently-used text or shortcut repetitive tasks by voice to work faster and smarter—whether you're creating documents, spreadsheets and presentations, sending emails, filling out forms or simply want to reduce the physical stress of typing. For professional dictation on the go, share your desktop dictations and automatically sync custom words and auto-texts with your Dragon Anywhere-enabled mobile device to be productive by voice in the office or on the road.

Achieve even better accuracy

Dragon for Mac provides improved accuracy over version 4.x (15% out of the box accuracy improvement over v4 and a 35% increase over v3), with optimization for latest speech recognition technology and enhanced support for more accents.

Improved support for internal microphones for freedom and flexibility

Now you have enhanced accuracy in using microphones built into all MacBook, MacBook Air, MacBook

Pro, and iMac computers. You're free to dictate documents and speak commands directly into your Mac without using a headset for optimal flexibility and convenience.

Sync with separate Dragon Anywhere mobile app

Dragon Anywhere is a separate, cloud-based app that provides continuous dictation capabilities, letting you create and edit documents of any length by voice—using your own customized words, shortcuts and commands—directly on your iOS or Android device. It adapts to your voice and terminology so you can dictate, edit, navigate and format quickly and accurately within your document from anywhere. Your documents can be shared and custom words and auto-texts synced with Dragon desktop offerings for seamless productivity wherever your job takes you. Gain immediate access to your dictation without having to wait or rely on a costly transcription service so can spend more time contributing to your bottom line and less time behind a desk completing administrative tasks.

Get enhanced support for more accents

Dragon for Mac offers improved recognition of Canadian, SE Asian,

To learn more about Dragon for Mac, as well as the complete line of Dragon speech recognition products, visit:

www.nuance.com/dragon/

Indian, and Australian English accents.

Gain powerful voice control in Word 2016

Dragon for Mac provides support for Word 2016 with Full Text Control and built-in commands lets you effortlessly mix talking and typing.

Save transcribed files as Microsoft Word documents

Transcription results can now be saved as .RTF or Microsoft Word format and opened in your application of choice. Previously, transcription results appeared in the Notepad, meaning you had to copy and paste them into your favorite application.

Enjoy a more intuitive user experience

Dragon for Mac appears in the OS X menu bar, making all features easily

accessible from a single menu. You can now change profiles right from the menu as well as instantly access preferences and tools to improve recognition. Dragon for Mac features a newly redesigned Status Window, looking more modern and at home on OS X Yosemite, incorporates a new guidance feature which displays the most common next steps relative to the actions you're taking at that moment, making it even easier to use.

Menu walking

Select items in any menu by voice. Menu walking lets you say "click File Menu" and the File menu opens, or say "click New File" and it works just like clicking a mouse.
