

## DS-9000/DS-2600 Firmware Release Ver.1.04

1. New Firmware Version F/W: Ver1.04

2. Content: Fix Firmware issues.

3. The contents of the firmware issue fixes:

1) Improved the device charging specifications.

#1. Enabled to charge via USB even when the device is PIN Locked.

#2. Support recharge from Battery Low via USB AC.

#3. Deleted the confirmation screen for "Charge battery?" when charging via USB AC.

2) Fixed the issue that the SD card may not be visible as a drive when connected to a Mac.

3) Fixed the issue that the speaker and microphone might not work when connected to a Windows 10.

4) Fixed the issue that the REW does not function at file end.

5) Changed the order of files to always be in the order of Job numbers.

**6) Support Append Recording in MP3 format. Insert recording and overwrite recording are not supported.**

7) Rev to Stop will no longer overrun the stop position.

8) Support a skip to the beginning or end of the file when you double click REW or FF.

9) Improved so that noise from the slide switch will be minimized when you Append Recording.

10) Allows Audio Class to function properly when connected to a Win 10 PC.

<Contents of release>

-Win version updater for DS-9000 and DS-2600.

-Mac version updater for DS-9000 and DS-2600. \*macOS 10.15 is not supported

-DS-9000 binary file.
