

Using Dragon® Medical Practice Edition 2 (an adjunct training guide)

ABOUT THE AUTHOR: Alexandria Carstens has been a Certified Trainer for Dragon NaturallySpeaking and Dragon Medical speech recognition software since 2000. Alexandria has been beta testing Dragon since 2001, working closely with its software engineers to continually improve the application.

What started as a 24 page booklet in 2000, the **Speakeasy Solutions Dragon NaturallySpeaking Training Workbook** quickly grew to approximately 300 pages. The intent was to remove the client's responsibility of actively taking notes during a training session so that they could focus on the subject at hand – using Dragon effectively. Training materials are constantly being rewritten, improved and adjuncts for specific purposes created.

Alexandria began the Speakeasy Solutions blog in 2009, the purpose to share factual information about the speech recognition and digital dictation industry from an objective viewpoint.

Alexandria has been a passionate user of Dragon since 1998, when she became stricken with chronic upper limb soft tissue damage. As a result of this lifelong debilitating condition, learning the "ins and outs" of realistically using

Dragon has been paramount to her continued use of computer technology. Alexandria is not content to simply be a user of Dragon, but as she says she "lives, eats, and breathes Dragon" for not only her benefit, but in order to assist her clients.

A devotee of efficiency, Alexandria is ever determined to utilize those aspects of Dragon that will accomplish the most effective results in any given workflow scenario. Alexandria is always keen to explore improved methods of using Dragon for virtually any task involving the computer, and takes great pleasure in assisting others do the same.

Alexandria studied Geology Chemistry at Queen's University in Kingston, Ontario, but quickly found a home for her innate administrative and computer skills within engineering and legal situations.

Alexandria enjoys living in Vancouver, British Columbia, a city perfect for her foodie pursuits. She enjoys "all things Japanese", history, future technologies, automobiles, table top games, photography, nature, nutrition, reading and cinema.

Contents

A.	Introduction	7
B.	Options	7
1.	Commands	7
i.	Require "Click" to select hyperlinks in HTML Windows	7
ii.	Require "Click" to select menus	8
2.	Hot Keys	9
i.	Microphone on/off	10
ii.	Force dictation recognition	10
iii.	Press-to-talk	10
iv.	DictationBox	10

ABOUT SPEAKEASY SOLUTIONS: Speakeasy Solutions Inc. is dedicated to providing you with personal, professional, and honest service. We strive to maintain ongoing relationships with our clients and provide them with expert support and the information they need to maximize their potential.

You will quickly discover how speech recognition (also referred to as voice recognition), and digital voice dictation and transcription enhances your day-to-day operations and increases productivity.

Speakeasy Solutions Inc. continually researches dictation and associated technologies to ensure that you receive current information and valuable assistance on a timely basis.

Speakeasy Solutions Inc. focuses on your particular needs above all else — providing you with customized, personal and premium service.

HISTORY OF SPEAKEASY SOLUTIONS: In the late 1990s the future founders of Speakeasy Solutions Inc. were stricken with upper limb chronic repetitive stress injuries, placing their occupations on hold. Their careers spanning the fields of administration, IT/IS and law, as well as a life-long natural affinity for technology, paved the way towards the formation of a new and highly specialized vocation: speech recognition and digital voice dictation providers.

At the time, Dragon NaturallySpeaking was in its infancy (version 3 had just been released) and the first professional digital voice recorders were entering the market. A few companies in North America were offering these products and fewer still providing accompanying services.

Speakeasy Solutions Inc. was formed in 2000 with a sincere desire in providing quality dictation solutions to professionals and those with physical limitations. Speakeasy Solutions Inc.'s founding principles were:

- Offer honest advice with the client's best interests in mind
- Provide excellent service that exceeds industry standards
- Continually improve product and service offerings through ceaseless research in order to provide clients with "the best" products, support and service possible

These are Speakeasy Solutions Inc.'s core values, and they always will be.
