

Improve documentation productivity.

Create high-quality documentation, faster and more efficiently, while saving time and money, with Nuance® Dragon® Professional Group.

Don't let heavy documentation demands impact productivity, costs or client service. Dragon Professional Group offers a faster and more efficient way to create documents, spreadsheets, and presentations, or fill out form-based reports—in the office or on the road—all by voice. Use robust transcription to turn voice files into text quickly and easily. Or use powerful voice commands to short-cut steps or streamline repetitive processes. With a next-generation speech engine leveraging Nuance Deep Learning technology, Dragon achieves high recognition accuracy while dictating, even for users with accents or those working in open office or mobile environments.

Work better, faster and smarter with accurate dictation and transcription.

Speed and simplify document creation.

Dictate documents 3 times faster than typing with 99% recognition accuracy, right from the first use. And since documents are created in a fraction of the time it would typically take typing by hand, you spend less time on paperwork and more time on profitable tasks.

Streamline repetitive or manual processes.

Having to type repetitive content or perform multi-step tasks is a drain on productivity. With its powerful voice command capabilities, Dragon makes it easy to automate these tasks. For example, create custom voice commands to insert standard boilerplate text or signatures into documents. Or create time-saving macros to automate multi-step workflows by voice.

Add custom words to meet your business needs.

While Dragon comes with an expansive built-in vocabulary, it can also be personalized to include the industry-specific terms or acronyms you use daily. Add custom words or word lists to achieve even higher dictation accuracy, and faster document turnaround.

Eliminate or reduce transcription time and costs.

Reduce dependencies on outsourced transcription services, or eliminate transcription bottlenecks. Using Dragon, employees are able to transcribe recorded notes or voice files of another single speaker into text quickly and easily back at the PC. Dragon's Auto Transcribe Folder Agent (ATFA) also makes it easy to transcribe batch files of audio recordings for additional time and cost savings.

Benefits at-a-glance

- Achieve faster documentation turnaround—in the office and on the go
- Work quickly and accurately by voice within the latest business applications
- Eliminate the need for costly transcription services or inefficient manual processes
- Improve your business reputation with faster turnaround of high-quality documentation
- Create time-saving voice commands to streamline repetitive typing or multi-step workflows
- Reduce repetitive stress injuries and create documents or perform computer tasks—all by voice

System requirements

- Windows 7, 8.1, 10 (32- and 64-bit), Windows Server 2008 R2, Server 2012 R2, and Server 2016 (64-bit)
- RAM: Minimum 4GB
- An Internet connection for product download and automatic product activation (a quick anonymous process)

Single-user license

Get documents done from anywhere.

Dragon's seamless synchronization across PCs, iOS® and Android™ devices through the cloud means you can keep up with work from any location. Use Dragon on popular touchscreen PCs, or sync with Dragon Anywhere Individual, Nuance's cloud-based, professional-grade mobile dictation solution and get documents done anytime, anywhere.

Enjoy advanced usability for additional efficiency gains.

Advanced usability features make Dragon even faster and easier to use. This includes simplified microphone choosing options, an improved user interface and helpful guidance, to a correction only mode that can be turned on for post-editing situations.

Benefit from roaming profiles.

With roaming profile, it's easy to back up and use your Dragon profile from any computer. Store user settings such as custom words, custom commands, and PowerMic settings and start dictating on any shared PC.

Work in Citrix® virtualized environments.

Deploy on Citrix XenApp® or Citrix XenDesktop® servers where the target application resides, enabling users to dictate from workstations that do not have Dragon installed on them.
